

5 We claim:

1. A fusion peptide sequence, composed of two peptides from interferons bound together with a linker of at least of one amino acid residue, the fusion peptide containing at least 10 identical amino acid residues in the top-horizontal line in the following table:

L	T	E	K	K	Y	S	P	S	S	L	K	D	R	H	D	F
R	R	R	R	H	R	R	A	A		Q	A	K	N	E		
Q	D	N	D		D	D	T	T		E	Y		M	N		
M	L	M	N		N	L	G	G		T		K	Y			
I	S	S	S						M			Q				
K	K	G	H								A					
E	A	E	A													
G		I														

10

wherein,

each amino acid residue in the top-line sequence can be modified with any of the amino acid residues in vertical line under it.

15

2. A drug composition including one or more of peptides according to Claim 1.

3. A recombinant protein involving one or more of peptides according to Claim 1 fused to said recombinant carrier protein.

20

4. A drug composition including one or more of recombinant proteins according to Claim 3.

5. A fusion protein according to Claim 3, wherein the carrier protein is albebetin, serum albumin, or immunoglobulin G.

25

6. A peptide sequence according to Claim 1, wherein the linker sequence is ser-ser.
